Task-5-prevention

Name – Goranshi Agarwal

Registration number – 25BAI11505

1. Preventions:

Stay safe online checklist:

- Make super-strong passwords for every account—no "123456" or your birthday! Mix uppercase/lowercase letters, numbers, and symbols, like "BhopalR0cks!2026". And never reuse the same one everywhere.

- Turn on two-factor authentication (2FA) everywhere important—email, Facebook, your bank app. It's that extra code sent to your phone that makes hackers sweat.

- Skip clicking links in random emails, texts, or posts, even if it "looks" like from your bank. Type the web address yourself instead.

- Before typing passwords or card details, double-check the site: Does it start with "https://" and have the right name (like sbi.co.in, not sb1.co.in)?

- Steer clear of public Wi-Fi (cafes, trains) for banking or logins—it's like shouting your secrets in a crowded market.

- Only grab apps from Google Play or App Store. Skip those shady APK downloads from weird sites.

- Think twice before posting personal stuff on social media—your address or phone number is gold to scammers.

- Never share your OTP, password, or details, no matter who calls claiming "bank emergency." Real companies won't ask.

UPI Tips:

- Never enter your UPI pin to receive money
- Never share OTP on the phone or with anyone
